

Montessori Stamp Game Pieces

Instructions:

Have children color the stamps or print the document in color. Units and thousands are green, tens are blue, and hundreds are red. Children begin by building the top number (addend). Building numbers always begins with thousands and progresses to the right. Once the top addend is built, the bottom addend is built, and then the stamps are added. Adding begins with the units and progresses to the left. Students regroup when they have more than 10 of any value stamp. Subtraction varies slightly. The top number is built and then the child takes the appropriate number of stamps away.
